

AI SOLUTIONS ENGINEER | AI ADOPTION & CONSULTING | SOLUTION ARCHITECTURE

AI Agents · Workflow Automation · Client Solutions · Business Process Design · Technical Delivery

Phone: +91 63546 66048 · Email: work.dhruvpathak@gmail.com · Portfolio: itsdhruv.online

LinkedIn: linkedin.com/in/dhruvvpatak

PROFESSIONAL SUMMARY

AI Solutions Engineer with hands-on experience translating business requirements into production-ready AI applications, intelligent workflows, and high-impact automation systems. Experienced across AI agents, LLM orchestration, deterministic automation, CRM integrations, voice AI, full-stack systems, and solution architecture. Proven bridge between business stakeholders and technical execution—operating from client discovery, workflow auditing, and opportunity identification through rapid prototyping, systems integration, and frontline adoption. Track record of delivering measurable outcomes including **60% reduction in manual prospecting effort**, **3x qualified pipeline velocity**, and custom conversational AI converting live client leads.

CORE COMPETENCIES

AI Solution Design

AI Adoption & Consulting

Client Discovery & Needs Diagnosis

Requirements Gathering

Solution Architecture

AI Opportunity Mapping

AI Strategy & Roadmaps

Business Process Design

AI Agents & Multi-Agent Systems

LLM Orchestration

Generative AI & RAG

Prompt Engineering

Voice AI & Conversational Design

Workflow Automation

CRM & Systems Integration

Lead & Sales Automation

Technical Project Execution

Cross-Functional Collaboration

Stakeholder Communication

API Integration

Product Implementation

Cloud Deployment

PROFESSIONAL EXPERIENCE

Growth Engineer — AI Solutions & RevOps · Clozzet India Feb 2026 – Present | Ahmedabad, India

Hyperlocal Fashion Marketplace · AI Solutions, Pipeline Architecture & Growth Automation

- Scoped and architected an end-to-end AI-powered partner acquisition system by diagnosing commercial bottlenecks and translating business growth goals into autonomous AI agents, CRM pipelines, and automated outreach infrastructure.
- Built multi-step AI agents for prospect discovery, qualification, and personalised outreach utilizing n8n and Make orchestrating LLMs, tightly integrated with HubSpot CRM and Apollo.io data streams.
- Reduced manual prospecting effort by 60% and tripled qualified brand leads per week across the partnership acquisition pipeline through intelligent automated qualification.
- Designed intelligent lead-scoring and partner onboarding workflows connecting AI-driven firmographic enrichment directly to real-time CRM stage progressions and trigger-based follow-ups.
- Coordinated implementation across product, marketing, and operations, owning the full delivery lifecycle from stakeholder requirements gathering and workflow mapping to technical validation and operational rollout.

Full-Stack Developer & ERP Architect · Independent Technical Delivery 2023 | Morbi, Gujarat, India

Client Solution Delivery · Business Process Digitalization · Institutional Systems Architecture

- Translated fragmented institutional operational requirements into a unified full-stack school ERP platform, auditing paper-based workflows across student attendance, academic grading, timetabling, and parent-faculty communications.
- Owned end-to-end technical delivery and solution architecture, engineering relational database schemas, REST APIs, responsive frontend portals, and role-based access control (RBAC) deployed to cloud infrastructure.
- Delivered a production platform serving 500+ active users across administrative and academic roles, eliminating operational data silos and establishing a single source of truth for daily institutional operations.

Campus Ambassador Leader — Technology Adoption · StudAI Genie Edutech Aug 2024 – Nov 2024 | Rajkot, India

Emerging Tech Adoption · Non-Technical Stakeholder Enablement · Workflow Automation

- Led AI and emerging technology adoption initiatives, communicating technical capabilities and practical generative AI applications to over 1,000+ students across multiple regional university campuses.
- Organized and facilitated 10+ hands-on technical workshops on AI tooling and data science, demystifying complex concepts for non-technical audiences and driving a 40% increase in student engagement.
- Designed and deployed automated event promotion and registration workflows utilizing low-code tools, reducing cross-campus coordination effort by 50%.

SELECTED AI SOLUTIONS & CLIENT PROJECTS

Production Voice AI Calling Agent — Conversational Inbound/Outbound System

[Live Client Deployment](#)

Business Problem: Client faced high lead drop-off and delayed response times for off-hours inbound phone inquiries, losing prospective admissions to competitors.

Solution Architecture: Designed and deployed production-grade inbound and outbound Voice AI agents with custom conversational persona logic (admissions advisor for a Rishikesh yoga school), natural interruption handling, dynamic FAQ retrieval, and calendar synchronization.

Business & Technical Impact: Automated lead capture and booking scheduling with sub-30-second response latency; successfully **converted 15+ inbound leads** directly into confirmed consultations without human manual triage.

Technologies: ElevenLabs, Voice AI, LangChain, REST APIs, Webhook Orchestration, CRM & Calendar Booking Integration.

Multi-Agent AI Business Automation Platform — Autonomous Sales Intelligence

[Production Architecture](#)

Business Problem: Business development teams spent 10+ hours per week manually researching prospective accounts, assessing ICP fit, and writing individual outreach emails.

Solution Architecture: Architected a multi-agent AI system employing LLM orchestration and specialized tool calling (search, company scraping, CRM query) to autonomously discover target accounts, score ICP alignment, and generate tailored outreach drafts.

Business & Technical Impact: **Saved ~10 hours of manual sales labor weekly** per rep while autonomously qualifying **10–15 high-intent prospect leads per week** with structured CRM logging.

Technologies: Multi-Agent Systems, LangChain, LLM Orchestration, n8n, Apollo.io API, HubSpot CRM, Python.

Student Performance Prediction System — Early-Warning ML Pipeline

[Machine Learning Pipeline](#)

Business Problem: Academic coordinators lacked proactive, data-backed mechanisms to flag academically struggling students prior to exam failures.

Solution Architecture: Developed an end-to-end predictive machine learning classification pipeline performing data hygiene, exploratory analysis, feature engineering, and model validation using logistic regression and decision trees.

Business & Technical Impact: Achieved **91% prediction accuracy** in identifying at-risk academic trajectories, giving educators actionable lead time for targeted pedagogical intervention.

Technologies: Python, Scikit-learn, Logistic Regression, Decision Trees, Pandas, Predictive Modelling, Data Analytics.

AI & TECHNICAL SKILLS

AI & LLM Systems:	LLM Applications, AI Agents, Agentic AI, Multi-Agent Systems, LangChain , LangGraph , CrewAI, RAG, Prompt Engineering, LLM Orchestration, Model Context Protocol (MCP), Tool Use & Function Calling, Voice AI , ElevenLabs
Automation & Business:	n8n , Make , Zapier, WhatsApp Business API, Lead Scoring & Routing, CRM Workflows, Sales Automation, HubSpot CRM , Apollo.io, Business Process Mapping
Software Engineering:	Python , JavaScript, TypeScript, React, Next.js, FastAPI, REST APIs, API Integration, Webhooks, Full-Stack Architecture, Role-Based Access Control (RBAC)
Cloud & Infrastructure:	Cloud Deployment, Vercel, AWS (EC2/S3 basics), Docker, CI/CD, Git, GitHub Actions, System Telemetry
Data & Machine Learning:	Scikit-learn , Logistic Regression, Decision Trees, Predictive Modelling, Data Hygiene & Analytics, Relational Database Design (PostgreSQL / MySQL)

EDUCATION & LEADERSHIP

Bachelor of Technology (B.Tech) in Information Technology

Expected May 2027

Marwadi University · Rajkot, Gujarat, India

Relevant Coursework: Artificial Intelligence, Data Science, Software Engineering, Database Management Systems, System Architecture.

Smart India Hackathon — Engineering Team Lead ([Plagiarism Detection Domain](#))

National Technical Initiative

Led a 6-member engineering team to design and deliver an automated algorithmic plagiarism detection solution under strict competition constraints. Owned solution scoping, task delegation, and technical stakeholder presentation.

CERTIFICATIONS & PROFESSIONAL TRAINING

• **LangChain & LangGraph:** Production Agentic Systems • • **AI for Product Management:** Opportunity Mapping & Roadmap Strategy • • **Data Science & Predictive Analytics:** Scikit-learn & ML Pipelines • • **AI Tools & Applied Technology:** Modern LLM Orchestration • • **Claude Code Engineering Bootcamp:** Advanced Tool-Assisted Development
